Punch holes for binding in the left side of the pages using Bind-it-All. Start each of the pages in the same place so the holes line up throughout the book.
Open to the middle of the book before weaving the 3/4" black wire through the pages. This makes sure the seam of the wire is on the inside of the book instead of being seen on the outside.

Place the book, wire side down, into the Bind-it-All and clamp down until the wire is sealed closed.
